Overview

# AW3

- The Allbotix **Butler Bot AW3** is a sophisticated indoor delivery robot designed for service environments (hotels, restaurants, hospitals, offices, etc.). It features four adjustable, enclosed compartments and is capable of cross-floor operation (including automatic elevator access). Below is a comprehensive breakdown of its specs, features, use cases, pricing, and certifications.
- With its cloud-based management platform, businesses can monitor the robot's status remotely and update its programming as needed. The robot can operate for several hours on a single charge and can automatically return to its charging station when battery levels are low.

# Usage Scenario

Restaurant

Hotel

Nursing home

Office

Karaoke

Hospital

Shopping Mall

Internet Bar

# Product Feature

Contactless Delivery

Delivery expert & good Helper

Extremely Cute Design

Multimodal Intersection

Safe and Stable Delivery

# Delivery Expert & Good Helper

The Allbotix BUTLERBOT AW3 can now take the elevator for item delivery, streamlining business processes. Automatic doors and ventilation ensure contactless, hygienic dish service, prioritizing privacy and spill prevention.

# Product Specification

Robot Size	459 x 549 x 1081 mm
Slope Angle	7°
Robot Weight	48kg
Charging Time	6.5h
Battery Life	Up to 12 Hours runtime
Cruise Speed	0.8m/s (2.63ft/s)
Total Load Capacity	20kg
Navigation Algorithm	360 Lidar, RGBD sensor, Camera, Visual + Laser SLAM

# Support Services

## Installation Training

Rich and diverse training methods and materials

## After Sales Service

IOT (The Internet of things) solves more than 90% of technical problems

# About Us

- **Allbotix is a cutting-edge robotics company that specializes in designing and developing innovation robotics solutions for various industries shaping**
- **The future by improving the capabilities of services robots our robots are designed to assist humans in solving issues , to be uses in human environments and to eventually becomes our partners**
- **Allbotix is a dynamic and inventive robotics business dedicated to changing the world of artificial intelligence**
